

# Domestic Lightning Protection

It is a proven fact that surge protection exponentially increases the life of electronic and electrical equipment it is protecting. The products below are some of the basic products which can be used in a household to protect against surges caused by lightning and poor quality of supply.

- SABS approved surge protection for distribution boards
- First line of defence against mains surges
- Double pole protection for single phase systems
- “Pluggable” design for easy replacement of blown modules

(Requires installation by qualified electrician)

**R 364.80** Incl VAT

- Protection for ADSL Modems, Computers, Fax, Cordless Phones
- Simple “plug ‘n play” device
- Fail safe and fire hazard protection

**R 144.42** Incl VAT

- Protects TV/DSTV systems
- Simple “plug ‘n play” technology
- Can be used with an SABS approved multiplug to protect multiple devices

**R 324.81** Incl VAT

- High end filter/protection for home theatre systems
- Simple “plug ‘n play” technology
- Available in 1, 3, and 5 socket variations

**R 721.26** Incl VAT
