

Office Lightning Protection

It is a proven fact that surge protection increases the life of electronic and electrical equipment it is protecting. Below are some of the basic products which can be used in a commercial/industrial environment to protect against surges caused by lightning and poor quality of supply.

- SABS approved surge protection for distribution boards
- First line of defence against mains surges
- 4-pole protection for 3-phase systems
- “Pluggable” design for easy replacement of blown modules

Requires installation by qualified electrician @ R 1 425.00 Incl VAT
(within 50KM of Midrand)

R 729.60 Incl VAT
